

Project 1.3.8 Choose Your Path Scoring Guidelines

This scoring guideline describes the programming concepts required in your program. You must provide your code and a screenshot of your output.

Requirements

Your Program Must

- Display the choice, read the choice, and create a new choice for the user.
- Use various if constructs.
- Provide a program reader with information about the program.
- Use camelCase.

Penalty

- Extraneous code that causes side effects (for example, printing to output)
- Code that causes errors
- Missing or poor-quality screenshots

No Penalty

- Extraneous code with no side effect

Scoring: Project 1.3.8 Choose Your Own Path**Part A. Program Code**

60 Points

Intent: Display the choice, read the choice, and create a new choice for the user.

+6	For each if statement, present a different path to the user.
+30	For each conditional, display a new statement and a new set of choices.
+24	After each conditional, display a new choice for the user until an end condition is met and the program exits.

Part B. Test Values

6 Points

Intent: Various if constructs.

+2	Two Nested Ifs
+2	Else If
+2	At least one compound Boolean expression

Part C. Comments

2 Points

Intent: Provide a program reader with information about the program.

+2	Comments on the important parts of the program
